

DOMINION™ Command and Control Information System

Innovative Public Safety Technology

The DOMINION™ series of command and control application systems offer advanced technology solutions for public safety agencies and the First Responder Community.

Comprising a comprehensive portfolio of customisable turnkey public security solutions, DOMINION™ provides the comfort of dependability to millions of people worldwide.

DOMINION™ Application Suite

Central to DOMINION™ is a cross-platform application suite that combines the latest in technological standards with TSI's extensive years of operational experience and resources.

DOMINION™ SenseMake
Intelligent data analysis

A perceptive system that processes real-time location, sensor and video data to achieve proactive command and control.

DOMINION™ Message
Effective data delivery

Complete interoperability in data messaging, retrieval and acquisition in a robust secured environment.

DOMINION™ Map
Advanced location support

Provides vital geographical data through high-quality maps and intelligent location features such as automatic vehicle routing.

DOMINION™ Maestro
Forward C2

Enables complete coordination of the forward command and field units with the command centre.

DOMINION™ Network
Seamless integration

DOMINION™ supports integration with legacy systems, and connects seamlessly to Wi-Fi, 3G/4G and proprietary networks (e.g. TETRA).

About Us

TSI is a leading security solutions provider with a global presence and proven track record in developing effective mission critical information systems. Our unique approach combines intelligent technology with extensive industry expertise—providing innovative solutions to suit your every security need.

DOMINION™ Systems Overview

DOMINION™ offers an extensive suite of public safety applications and software to provide robust and reliable Command and Control (C2).

We provide comprehensive support for all applications so as to ensure best utilisation of modules, upgrades, multi-language interfaces (including Arabic) and enhancements for maximum benefit.

DOMINION™ Playback

A host of innovative video features including:

Playback of video feeds for single or multiple targets

Simultaneous display of video, audio and location of selected devices

Export video/audio to normal video files, playable on standard video playback software

DOMINION™ Map

Obtain high-quality geographical and locational data with cutting-edge supporting features:

Raster map: Google Maps, Bing Maps, customer-provided geo-images

3D vector map: customer-provided shape files, customer drawings

Unique view options: full-view, zoom, pan, rotation, full-screen

Point-of-interest annotation and bookmark

Import and export viewport

Landmark, road and address search

Measurement of map distance and area

Route planning

DOMINION™ Admin

Supports multiple administrative functions including:

User account management

Device management

Account type management

Role privilege management

Over-the-air update for front-end devices

DOMINION™ Report

Gather and analyse vital data and parameters via a range of report formats:

Speeding report

System error report

Audit trail report

Target location report

Customised report

DOMINION™ Secured Messaging

Communicate data effectively and efficiently via:

Text message

Video/voice call

File-sharing

DOMINION™ Alerts

Customise business rules and alerts for various actions:

Device status

Geo-fencing

Speeding

Device tampering

Motion detection

Battery status

DOMINION™ Monitor

Enhanced tracking capabilities with advanced features:

Data on device location and status (battery level, IO status, signal strength etc.)

Video and audio sensors

Geo-fencing

Third-party video feeds
